Students to each other. And all to a worldwide network of information. The pressure is on to deliver a better learning environment and better technology solutions for the money. Installation is easy and fast. Typically, less than 2 hours. And all to a worldwide network of information. Next Flexibility and Performance to Meet Your Demands Technology, Front and. It is capable of projecting a 60 inch projection screen from only 30 inches. The short throw benefit allows the projector to be mounted very close to the screen, and it eliminates the shadow effect and light from the projector from blinding you. It comes with annotation software that gives you interactive experience. The stylus pen supplied with the software lets you control computer applications from the board.

Its Lens Shift Button is suitable during installation as it adjusts the lens when youre setting up the

projector so a clear image can be projected. The 3M SCP716 Projector gives you many options to mount with the Folding Wall Mount being the best option. This mounting option moves the projector out of the way when it is in the closed position, and is available with two 20W speakers. Experience the 3M difference for yourself; proven high quality and reliable performance. Vikuiti Super Close Projection by 3M Versatility for Challenging Environments Traditional projection technology requires projecting on to a screen from a distance. This 3M innovation enables SCP projectors to deliver large, brilliant images from very close to the screen. Harnessing the power of light, Vikuiti Super Close Projection delivers exceptionally large, brilliant images from very close to the screen. The 3M SCP716 Projection System utilizes the Superior Contrast, Focus, Brightness and Uniformity of DLP Projection. When wall mounting is the right solution, the 3M SCP716 Projection System utilizes revolutionary spacesaving technology, turning an underutilized space into a fully functional workspace. The adjustable arm allows image size from 59. Center of Digital Class Rooms The future of education is technology. Technology that connects teachers to students. And all to a worldwide network of information. The 3M Super Close Projection System SCP716 brings the digital classroom to life with superior technology, unmatched versatility and a low Total Cost of Ownership TCO. Technology Front and Center The 3M Super Close Projection System SCP716 is a DLP projector with 3M. Vikuiti Super Close Projection technology that can project the same size image from 40 inches as a conventional projector does from 10 feet away. BrilliantColorTechnology uses up to six separate colors to produce a more lifelike image. By contrast, RGD uses only the time primary colors red, green and blue.

The SCP716 is the only shortthrow projector with integrated lens shift, which allows the projected image to be adjusted on the screen for better centering. This leading edge digital imaging technology provides superior image contrast, focus, brightness and uniformity. Raise Your Classroom IQ The SCP716 works with computers. See the light School districts are faced with increasing educational requirements and decreasing budgets. The pressure is on to deliver a better learning environment and better technology solutions for the money. Save Space with 3M Wall Mounts Ideal for classrooms with low ceiling heights, 3M wall mount neatly manage all cables and make it easy to adjust the image to accommodate different whiteboards Folding Wall Mount Fixed Wall Mount Compact closed profile for added safety Distinct stereo sound with 20 watt speakers delivering quality sound, wall mount with out speakers is also available The projector and wall mount connect via a movable ball joint, which makes adjusting the projector smooth and simple. Easy to navigate onscreen menus are included, along with teacherfriendly software tools that can even integrate with Webbased education resources. There's also a builtin 3M Image Gallery with more than 2,700 images to enhance lesson plans. With our penlike interactive stylus, teachers can annotate, navigate and access all kinds of educational materials on their PCs or any other connected devices. These lamps are beneficial as they reduce the need for power plants to burn fossil fuels to generate electricity, reduce the release of emissions including mercury, carbon dioxide and other pollutants that affect global warming. Fluorescent lamps reduce solid waste, since they last longer. The incandescent or halogen lamps have a short life and require frequent replacement. The lamps used in Hitachi projectors have a long life.

These energyefficient lighting products such as the fluorescent lamps, CFLs, and the high intensity discharge HID lamps contain small amounts of mercury. The mercury remains inside the lamp and doesn't hurt the environment unless the lamp is broken. This mainly happens at the end of its life. The lamp is mostly broken when it is thrown in a garbage truck or a dumpster; thereby releasing mercury. These lamps are not a major source of mercury pollution, but the improper disposal of large numbers of them adds mercury to the environment. Mercury is also released into the environment by burning hazardous wastes or incineration of disposed materials. 40% of manmade mercury emissions is from fossilfuel burning power plants. To prevent the release of mercury from the lamps, it is better to recycle them and not dispose them in the solid waste. Recycling lamps helps

to capture the mercury, and it can be reused. The US Environmental Protection Agency has special regulations for the mercury-containing lamps. This eliminates excessive paperwork, alleviates transport issues, and helps keep disposal costs low. It also eases the path for lamp recycling. Mercury collection is a robust and growing business. It was developed to collect and recycle end of life mercury lamps from commercial buildings. Retail consumers are also having their options expanded rapidly. Most local governments collect end-of-life lamps and some retailers like Ikea and Home Depot also collect the lamps. Its technological manufacturing platform includes Adhesives, Abrasives, Light Management, Microreplication, Nonwoven Materials, Nanotechnology, and Surface Modification. 3M's Consumer and Office product line up include projectors. Projectors make learning fun as students of all abilities are able to learn in a safe, fun, and engaging environment. The projectors help bring learning to life. They can be combined with educational software products to develop children's essential hand-eye coordination and IT skills.

The best selling projectors include the SCP712 Super Close Multimedia LCD Digital Projector, SCP716 Super Close Multimedia Projector, and the SCP716W Multimedia Projector. With a commitment towards excellence and continuous improvement to products, 3M has earned the position of a global leader in the market. With aggressive planning and goal setting, 3M should continue to be a leader in global sales with its excellent line of products. Digital and multimedia projectors project a video signal on a projection screen. They use a bright lens system for projecting the image. These projectors are used in meeting rooms, conference rooms, classrooms, auditoriums and where ever the need arises. 3M, Boxlight, Elmo and Hitachi specialize in digital and multimedia projectors are. Popular projectors are 3M's X45, SCP712, SCP716 and X95i, Boxlights Seattle X22N, Travelight3 Ultra and ProjectoWrite2, Elmos IP40SE and IP750E, and Hitachi's CPX5, CPX2011N, CPX4 and CPDW10N. Well update your product price as you make your selections. Ordered via phone to insure I was ordering properly. Representative handled order perfectly. Shipment arrived very promptly, even before I had cleared a space in my office to put it. Prices are subject to change based on your order and delivery locations and the applicable retail store. Please wait. added to cart Continue shopping 5 or. Weighing in at 7.6 pounds 3 kg, the projector is a great travel mate and ideal for the mobile user. With 2,400 ANSI lumens of brightness, whether on the college campus or the meeting room, the projector delivers crisp HD performance. It improves perceived sharpness, brightness and contrast, and projects lifelike images with remarkable depth. Combining strong specs and features like a 1,800:1 contrast ratio and LCD Display Technology, the SCP716 will automatically compensate for changing ambient light conditions.

The DLP projector features a 3M Vikuiti Super Close Projection technology that can project the same size image from 40 inches as a conventional projector does from 10 feet away. The SCP716 has an approximate lamp life of 5,000 hours and wide connectivity options, making it easy to use various multimedia components to fit your presentation needs. The native 4:3 aspect ratio projector delivers media in clear XGA, 1024 x 768 resolution and is easily switched to 16:9 format when needed. With two optional 20W speakers, several mounting options, and the optional Annotation Sensor which turns a standard whiteboard into an interactive surface the SCP716 is a powerful and convenient teaching tool. Besides its many performance attributes, the 3M SCP716 Super Close Projection Systems is bottomline friendly. Multisource Use The SCP716 works with computers, DVD players, camcorders, document cameras, tablets and most brands of interactive whiteboards to transform information and lesson plans into engaging opportunities for education enrichment. Long Lamp Life The SCP716's 5,000 hour lamp and low maintenance yield a low total cost of ownership. Fast Installation Installation is easy, fast and typically accomplished in less than 2 hours. DLP Technology Instead of having glass panels LCD through which light is passed, the DLP chip's surface is made up of thousands of tiny mirrors each representing a single pixel. Annotation Sensor The optional 3M Annotation Sensor turns a standard whiteboard into an interactive tool. Optional Wall Mount Optional 3M folding wall mount with included 20W speakers.
