Finding Information All chapter headings and subheadings are listed You'll hear them when Start you dial and press, and they continue for about 40 seconds after dialing. During that time, the sending machine must begin the "handshake" with the receiving machine. Each time you use automatic procedures to send a fax, you are sending CNG tones over the phone line. You'll soon learn to listen for them. Never touch telephone wires or terminals that are not insulated unless the telephone line has been disconnected at the network interface. Use caution when installing or Do not allow the 2 level of paper to pass maximum paper line on the paper guides. Similarly, you can protect yourself when you want to move your machine, by The two phone numbers can be on separate jacks RJ11 or combined into one jack RJ14. Your machine must be plugged into an RJ11 jack. RJ11 and RJ14 jacks may be equal in size and appearance and both may contain four wires black, red, green, yellow. To test the type of jack, plug in a twoline phone and see if it can access both lines. If it can, y The most common connection is to put the Brother machine on Line 2, which is our assumption in the following steps. While it is often relatively simple to connect the fax machine to a key system or a PBX Private Branch Exchange, we suggest that you contact the company that installed your telephone system and ask them to connect the fax machine for you. It is advisable to have a separate line for the fax machine. You can then leave the fax machine in FAX ONLY Mode to receive faxes any time of day or night. S When you have an external TAD on the same telephone line as the fax machine, the TAD answers all calls. The fax machine "listens" for fax calling CNG tones. If it hears them, the fax machine takes over the call and receives the fax. If it doesn't hear CNG tones, the fax

machine lets the TAD continue playing your outgoing message so your caller can leave. Year 2000 Compliant. <http://decamiones.com/userfiles/canon-elura-65-manual.xml>

Brother is addressing the Year 2000 related issues for all Brother fax machines and multifunction centers. Brother Bulletin Board. It says Check Paper and there is paper in it Any troubleshooting ideas Im not sure if it would address this problem though. The other day I couldnt get it to accept the paper again I just kept trying, took a break, came back and then it worked Must be the way the moon was shining just kidding!!

These sensors do go bad alot as they are nothing more then a small LED and a light dependant resistor, all combined into a small package, but good luck in getting them from the manufacturer. Sometimes as I mentioned before though is that there is dirt or dust inbetween these sensors and will not let them work properly. If you see the small plastic lever that touches the paper to see if there is anything there, follow the other end, as you will see it will go inbetween a small, and mostly black device, that will break or block a small light I described earlier. Good Luck and let us know if you get this working or if they want you to send the unit in for service. Last thing preformed on this was a fax that came throuh fine, but copier seems not to copy anything and at this point I would not think that fax would either. I presently own 3 others, in different locations. Please advice if I can fix this or what it may be. Thank you. I only use it as a copier.
